This map was compiled from U.S. Geological Survey quadrangle maps, aerial photography flown in March, 1986, General Land Office plats, road inventory surveys March, 1988, and other map data.
This map was prepared on the transverse Mercator projection, NAD 83, East Zone, Florida system of plane coordinates.
The railroad station symbol as shown on this map does not necessarily denote the presence of a depot or like facility. It may be only a point designated for the receipt or delivery of freight, such as a platform or siding.
Delimited Areas or Residential Areas Under Development were compiled from aerial photography flown March, 1986 without field verification.
In congested rural areas local roads are indicated by a single line only. For details refer to insets prepared for this county.
No attempt has been made to show all drainage canals and ditches.
This map does not include the city streets of Okeechobee. Which are on the state maintained highway system.
City populations are taken from the U.S. Census for 1980.
In 1980 the population of Okeechobee county was 20,264. There are 780 square miles in the county
Maps of this series are in the public domain. The maps are compiled and published using public tax monies and are copyrighted to prevent photocopy and resale for profit.
