This map was compiled from U.S. Geological Survey quadrangle maps, General Land Office plats, aerial photography flown in 1966, road inventory surveys May, 1966, and other map data.
This map was prepared on the transverse Mercator projection with plane coordinates as established for the Florida West Zone.
The railroad station symbol as shown on this map does not necessarily denote the presence of a depot or like facility. It may be only a point designated for the receipt or delivery of freight, such as a platform or siding.
Portions of railroad and other secondary symbols are omitted in order to show topography.
In congested rural areas local roads are indicated by a single line only. For details refer to inserts prepared for this county.
City populations are taken from U. S. Census for 1970.
No attempt has been made to show all drainage ditches and canals.
1970 Hardee county population is 14,889.
