This map was compiled from U.S. Geological Survey quadrangle maps, General Land Office plats, aerial photography flown in 1962, road inventory surveys October 1964, and other map data.
This map prepared on the transverse Mercator projection, East Zone, Florida system of plane coordinates.
The railroad station symbol as shown on this map does not necessarily denote the presence of a depot or like facility. It may be only a point designated for the receipt or delivery of freight, such as a platform or siding.
In congested rural areas local roads are indicated by a single line only. For details refer to insets prepared for this county.
Portions of railroads and other secondary symbols are omitted in order to show topography.
No attempt has been made to show all drainage canals and ditches.
City populations are taken from the U.S. Census for 1960.
This map does not include the city streets of Okeechobee which are on the state maintained highway system.
