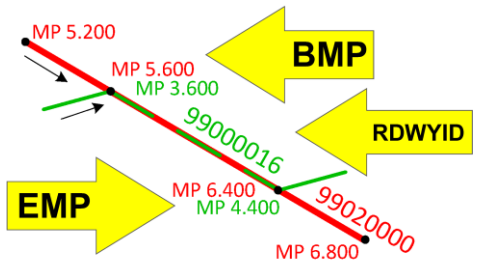
FEATURE 143

ASSOCIATED STATION EXCEPTION

Roadway Side	Allows Tie	LRS Package	Feature Type	Interlocking	Secured
C	No	No	Length	Yes	Yes
Responsible Party for Data Collection	District Planning				

Definition/Background: Stationing exceptions are used to indicate where two Roadway IDs traverse the same segment between two points (usually intersections). Only one of the roadways carries the data and the other roadway points to it. This is to avoid duplication of mileage.



How to Gather this Data: These characteristics are **automatically generated** when Feature 141 is coded.

Do not delete Feature 143 or any of its characteristics.

RDWYID | COUNTY, SECTION, SUB-SECTION
BEGSECPT | BEGIN SECTION MILEPOINT OF EXCEPTION
ENDSECPT | END SECTION MILEPOINT OF EXCEPTION

HPMS	MIRE	Who/What uses this Information	Required For	Offset Direction	Offset Distance
