This map was compiled from U.S. Geological Survey on triangle maps, General Land Office plats, aerial photography from January, 1968, and November, 1969, road inventory surveys January, 1971, and other map data.

This map was prepared on the transverse Mercator projection, West Zone, Florida system of plane coordinates.

The railroad station symbol as shown on this map does not necessarily denote the presence of a depot at the facility. It may be only a point designated for the receipt or delivery of freight, [illegible] siding.

Portions of railroads and other secondary symbols are omitted in order to show topography.

City populations are taken from U.S. Census for 1970.

In congested rural areas local roads are indicated by a single line only. For details refer to insets prepared for this county.

No attempt has been made to show all drainage canals and ditches.

1970 De Soto County population is 13,000.

GRID NORTH AT TRIANGULATION STATION "PEACE" IS 00°2'44" EAST OF TRUE NORTH
MAGNETIC NORTH IN SEPTEMBER, 1971, IS APPROXIMATELY 4°4' EAST OF TRUE NORTH
ANNUAL MAGNETIC CHANGE IS APPROXIMATELY 7.5' WESTWARD
