This map was compiled from U.S. Geological Survey quadrangle maps, General Land Office plats, aerial photography flown in August, 1964, and July, 1965, road inventory surveys February, 1966, and other map data.
This map was prepared on the transverse Mercator projection, West Zone, Florida system of plane coordinates.
The railroad station symbol as shown on this map does not necessarily denote the presence of a depot or like facility. It may be only a point designated for the receipt or delivery of freight, such as a platform or siding.
Portions of railroads and other secondary symbols are omitted in order to show topography.
In congested rural areas local roads are indicated by a single line only. For details refer to insets prepared for this county.
City populations are taken from U.S. Census for 1960.
GRID NORTH AT SARASOTA IS 0° 3' 40" WEST OF TRUE NORTH
