This map was compiled from U.S. Geological Survey quadrangle maps, aerial photography flown in January, 1973, General Land Office plats, road inventory surveys January, 1975, and other map data.

This map was prepared on the transverse Mercator projection, West Zone, Florida system of plane coordinates.

The railroad station symbol as shown on this map does not necessarily denote the presence of a depot or like facility. It may be only a point designated for the receipt or delivery of freight, such as a platform or siding.

Road alignments and estimated populations in Delimited Areas were compiled from aerial photography flown in January, 1973 without field verification.

In congested rural areas local roads are indicated by a single line only. For details refer to insets prepared for this county.

No attempt has been made to show all drainage canals and ditches.

City populations are taken from the U.S. Census for 1980.

In 1980, the population of Sarasota County was 202,251. There are 529 square miles in the county.
