This map was compiled from the U.S. Geological Survey, aerial photography flown in February 1970, road inventory surveys April, 1976, and other area data.

This map was prepared on the Transverse Mercator projection, West Zone, Florida system of plane coordinates.

The railroad station symbols shown on this map does not necessarily denote the presence of a depot or like facility; they may be only a point designated for the receipt or delivery of freight, such as a platform or siding.

City populations are from the U.S. Census for 1970.

In 1970 the population of Charlotte County was 27,392. There are 700 square miles in the County.

Permission to obtain and reproduce this map must be authorized by the District Administrator, District Office, State of Florida, Department of Transportation, Tallahassee, Florida, 32304.

In congested rural areas local roads are indicated by a single line only. For details refer to detailed maps of this county.

No attempt has been made to show all drainage canals and ditches.
