ANNUAL MAGNETIC CHANGE IS APPROXIMATELY 0°4'0" WESTWARD
This map was compiled from U.S. Geological Survey quadrangle maps, A.S.C.S. photography dated 1964, General Land Office plats of surveys, railroad surveys May, 1966, and other map data.
This map was prepared on the Transverse Mercator and East Zone Florida system plane coordinates.
The railroad station symbol as shown on this map does not necessarily denote the presence of a depot or like facility. It may be only a point designated for the receipt or delivery of freight, such as a platform or siding.
Portions of railroads and other secondary symbols are omitted in order to show topography.
In unpaved rural areas local roads are indicated by a single tone. For details refer to issues prepared for this county.
Care has been taken from the U.S. Census for 1960.
No attempt has been made to show all drainage ditches and canals.
Due to insufficient space land grants will not be shown by name on this map.
