This map was compiled from U.S. Geological Survey quadrangle maps, General Land Office Survey township plats, Photogrammetric Mapping, road inventory surveys May-October 1956, and other map data.

This map was prepared on the Lambert conformal conic projection, North Zone, Florida system of plane coordinates.

In contested rural areas local roads are indicated by a single line only. For details refer to insets prepared for this county.

City populations are taken from the U.S. Census for 1960.

Portions of railroads are omitted in order to show topography.
