
This map was compiled from U.S. Geological Survey quadrangle maps, aerial photography flown in Oct., 1974, General Land Office plats, road inventory surveys May 1978 and other map data.

This map was prepared on the transverse Mercator projection. East Zone, Florida system of plane coordinates.

This map was compiled using interactive computer graphic techniques.

The railroad station symbol as shown on this map does not necessarily denote the presence of a depot or the facility, it may be only a point designated for the receipt or delivery of freight, such as a platform or siding.

Road alignments and estimated populations in Delineated Areas were compiled from aerial photography flown in Jan. 1978, without field verification.

In congested rural areas local roads are indicated by a single line only. For details refer to inset prepared for this county.

No attempt has been made to show all drainage canals and ditches.

City populations are taken from the U.S. Census for 1980

In 1980, the population of Seminole County was 179,752. There are 321 square miles in the county.

No claim is made for the basic cartographic source material taken from a work or works of the United States Government.

Maps of this series are in the public domain. The maps are compiled and published using public tax funds and are copyrighted to prevent photocopy and resale for profit.

Permission to copy or reproduce this map must be authorized by the State Topographic Bureau, Department of Transportation, Tallahassee, Florida 32301.
