This map was compiled from U.S. Geological Survey quadrangle maps, General Land Office plats, A.S.C.S. aerial photography taken in 1964, U.S. Forest Service photography taken in 1958, local field survey surveys June, 1967, and other sources.
This map was prepared on the transverse Mercator Projection, West Zone, Florida system of plane coordinates.
The railroad station symbol as shown on this map does not necessarily denote the presence of a depot or like facility. It may be only a point designated for the receipt or delivery of freight, such as a platform or siding.
Portions of railroad and other secondary symbols are omitted in order to show topography.
City populations are taken from U.S. Census for 1960.
In congested rural areas local roads are indicated by a single line only. For details refer to insets prepared for this county.
No attempt has been made to show all drainage canals and ditches.
