This map was compiled from U.S. Geological Survey quadrangle maps, aerial photography flown in March, 1976; General Land Office plats, road inventory surveys March, 1977 and other map data.

This map was prepared on the transverse Mercator projection, West Zone, Florida system of plane coordinates.

The railroad station symbol as shown on this map does not necessarily denote the presence of a depot or like facility. It may be only a point designated for the receipt or delivery of freight, such as a platform or siding.

Road alignments and estimated populations in Delimited Areas were compiled from aerial photography flown in March, 1976 without field verification.

In congested rural areas local roads are indicated by a single line only. For details refer to insets prepared for this county.

No attempt has been made to show all drainage canals and ditches.

Due to insufficient space land grants will not be identified by name on this county.

City populations are from the U.S. Census for 1970.

In 1970, the population of Marion County was 69,030. There are 1,617 square miles in the county.

Permission to copy or reproduce this map must be authorized by the State Topographic Office, Department of Transportation, Tallahassee, Florida 32304.

No claim is made for the basic cartographic source material taken from a work or works of the U.S. Government.
