TRIANGULATION STATION WITH NAME
LOCATION OF SYMBOL
CIVIL DEFENSE HEADQUARTERS
This map was compiled from U.S. Geological Survey quadrangle maps, General Land Office plats, aerial photography flown in December, 1962, Pinellas County General Atlas maps by County Engineers, and road inventory surveys February, 1963, and other map data.
This map was prepared on the transverse Mercator projection with plane coordinates as established for the Florida West Zone.
In congested rural areas local roads are indicated by a single line only. For details refer to insets prepared for this county.
The railroad station symbol as shown on this map does not necessarily denote the presence of a depot or like facility. It may be only a point designated for the receipt or delivery of freight, such as a platform or siding.
Portions of railroads and other secondary symbols are omitted in order to show topography.
City populations are taken from U.S. Census for 1960.
No attempt has been made to show all drainage ditches and canals.
GRID NORTH AT TRIANGULATION STATION JORDAN IS 0°19'28" WEST OF TRUE NORTH
MAGNETIC NORTH IN JULY 1964 IS APPROXIMATELY 1°8' EAST OF TRUE NORTH
ANNUAL MAGNETIC CHANGE IS APPROXIMATELY 4'55" WESTWARD
