Trail Feature

The trail feature is exclusively used for trails.

FEATURE 801

TRAILS

Trail Side	Allows Tie	LRS Package	Feature Type	Interlocking	Secured
C	Yes	No	Length	Yes	Yes
Responsible Party for Data Collection	Systems Implementation Office. For further assistance, please contact the SUN Trail Network Manager at (850) 414-4922 or the Transportation Planner at (850) 414-4912.				

Definition/Background: The SUN Trail data is derived from the Florida Greenways and Trails System (FGTS) Priority Land Trails Network, overseen by the Florida Department of Environmental Protection's Office of Greenways and Trails. A multi-use trail is defined as a paved, shared use path, which is typically 12 feet wide, but may commonly vary from 10 feet to 14 or more feet depending upon constraints or volume of use. In some areas of extreme constraints such as at bridges or in environmentally sensitive areas, a trail may be as narrow as 8 feet. A multi-use trail is differentiated from a sidewalk in that it is generally wider, is part of a larger regional and statewide system of trails, and is accompanied by a higher level of facilities including trailheads, parking, wayside areas, and other amenities. A trail is designed to facilitate mixed-use travel and priority at intersections may be given to trail users. A sidewalk, by contrast, serves a local need and is routinely built as part of the normal bicycle and pedestrian accommodations within a roadway project. Sidewalks are designed primarily for pedestrian use (acknowledging that local codes may permit bikes on sidewalks) with priority at intersections normally given to roadway traffic.

SUNTRTYP | SUN TRAIL TYPE

HPMS	MIRE	Who/What uses this Information	Required For	Offset Direction	Offset Distance
N/A		Systems Implementation Office/District Office	All multi-use trails, regardless of funding source, located within the SUN Trail Network, both On-and-Off (FDOTs) system.	N/A	N/A

How to Gather this Data: Enter the code value assigned to the route and record the beginning and ending milepoints.

Codes	Descriptions
1	Active Trail
2	Pending Trail
3	Dropped SUN Trail GIS Route (Historical)
4	Deleted, Physical removal of Infrastructure

1—Active Trail: An Active Trail is defined as an existing multi-use trail, on the SUN Trail network, that is open to the public for bicycling or walking and is physically separated from vehicular traffic. These Active Trails are located both on-and-off (FDOTs) system.

01: Active Trail

This does not include bike lanes or sidewalks or paved shoulders. Existing trails are compiled from local, state, and federal agencies and organizations.

2—Pending Trail: A Pending Trail is defined as a linear corridor that is located on the SUN Trail network and is planned as a multi-use trail, physically separated from vehicular traffic, but the construction phase has not been completed. Pending Trails are not open to the public for bicycling and walking. The linear corridor may be located on-or-off (FDOTs) system.

There may or may not be funding committed to facilitate pre-construction [feasibility planning or corridor study; preliminary and environmental planning (PDE); design (PE); or the acquisition of real property/land/right-of-way (ROW)]; and construction phases. Funding for pre-construction and/or construction phases may be from local, state, federal, or private sources. When the construction phase is complete, the status will change from “pending trail” to “active trail.”

2: Pending Trail

3—Dropped SUN Trail GIS Route (Historical): Dropped SUN Trail GIS Route are defined as planned corridors that were previously located within the SUN Trail Network but are de-designated and no longer considered to be part of the SUN Trail Network. This historical GIS Route is for mapping purposes and does not reflect current system mileage.

4—Deleted Trail: A Deleted Trail is defined as an active trail that will be de-designated when the infrastructure is physically removed, relocated, and a facility replaces it. This does not include temporary closures.

SUNTRCOR | SUN TRAIL CORRIDOR NAME

HPMS	MIRE	Who/What uses this Information	Required For	Offset Direction	Offset Distance
N/A		Systems Implementation Office/District Office	All designated SUN Trail facilities.	N/A	N/A

How to Gather this Data: Identify the Corridor name (see codes) and record the beginning and ending milepoints. Enter the **MAPID** codes assigned to the facility.
