This map was compiled from U.S. Geological Survey quadrangle maps, General Land Office plats, road inventory surveys, aerials, 1966 and other map data.

This map is projected on the transverse Mercator projection, East Zone, Florida system of plane coordinates.

The railroad station symbol as shown on this map does not necessarily denote the presence of a depot or like facility. It may be only a point designated for the receipt or delivery of freight, such as a platform or siding.

Portions of railroad and other secondary symbols are omitted in order to show topography.

In congested rural areas local roads are indicated by a single line only. For details refer to plats prepared for this county.

City populations are taken from U.S. Census for 1970.

No attempt has been made to show all drainage canals and ditches.

1970 Collier county population is 38,040.
