This map was compiled from U.S. Geological Survey quadrangle maps, aerial photography flown in Jan. ,1976, General Land Office plats, road inventory surveys May ,1978, and other map data.

This map was compiled using interactive computer graphic techniques.

This map was prepared on the transverse Mercator projection West Zone, Florida system of plane coordinates.

The railroad station symbol as shown on this map does not necessarily denote the presence of a depot or like facility. It may be only a point designated for the receipt or delivery of freight, such as a platform or siding.

Road alignments and estimated populations in Delimited Areas were compiled from aerial photography flown in Jan. ,1976, without field verification.

City populations are taken from the U.S. Census for 1980.

In 1980, the population of Pinellas County was 728,409. There are 264 square miles in the county.

Permission to copy or reproduce this map must be authorized by the State Topographic Bureau, Department of Transportation, Tallahassee, Florida 32301.

No claim is made for the basic cartographic source material taken from a work or works of the United States Government.

Maps of this series are in the public domain. The maps are compiled and published using public monies and are copyrighted to prevent photocopy and resale for profit.
